PROFESSIONAL SUMMARY

Full-Stack Software Developer with 2+ years of experience in building scalable applications using Laravel, ReactJS, and MySQL. Skilled in designing data-driven systems, optimizing performance, and ensuring data accuracy and integrity. Experience in developing user-friendly applications, REST APIs, and handling large datasets with strong problem-solving and analytical abilities. Passionate about building efficient data management systems and interested in mobile application development and public health research technologies.

TECHNICAL SKILLS

Backend : PHP (Laravel), REST API Development, JWT/Sanctum Authentication, MVC Architecture, OOP, API Integration, Server-side Validation, Queue Jobs (Laravel), Basic Caching (Redis/File)

Frontend : HTML5, CSS3, Bootstrap, JavaScript (ES6+), AJAX, jQuery, ReactJS (Component-based UI, Props, State, Hooks), Responsive Design, Cross-browser Compatibility, Basic UI/UX Principles

Database : MySQL, Query Optimization, Database Design, Indexing, Relationships (One-to-Many, Many-to-Many), Data Migration & Seeding

Tools : Git/GitHub, Jira, Postman, VS Code, Chrome DevTools, Agile/Scrum Methodology, Debugging & Performance Optimization

PROFESSIONAL EXPERIENCE

Software Developer

Oct 2025 - Feb 2026

Matjar Online

- Spearheading bug fixes and performance optimization to make the application more stable, efficient, and user-friendly.
- Enhancing existing system modules by improving code quality, reducing load times, and resolving critical UI/UX issues.
- Collaborating with the development team to identify technical gaps, implement feature improvements, and ensure smooth application functionality across all platforms.
- Worked with ReactJS-based frontend components to enhance UI responsiveness and user experience.
- Integrated ReactJS frontends with Laravel REST APIs.
- Collaborated with frontend developers and designers to implement reusable UI components and improve performance.

Software Developer

Feb 2024 - Sep 2025

Net Planet Soft & Engineering

- Developed and deployed 5+ production web applications using Laravel and ReactJS.
- Conducted comprehensive software testing and debugging, reducing application defects.
- Created and maintained technical documentation, including system specifications, user manuals and API documentation.

EDUCATION

Bachelor of Science: Computer Science and Engineering

July 2019 - August 2023

University of Information Technology and Sciences

Relevant coursework: Data Structures, Algorithms, Machine Learning, Database Management.

CGPA: 3.54 / 4.00

THESIS

Title: Temporal Analysis of Epileptic Seizures Using Graph-Based Deep Learning

Description: Conducted research on graph-based deep learning models for the temporal analysis of epileptic seizures. This work contributed to advancements in medical diagnostics by enabling more accurate detection and prediction of seizure patterns through innovative AI methodologies.

PROJECTS

Wmelons - Multi-vendor E-commerce

- Developed and optimized a WooCommerce-style platform using ReactJS and Laravel
- Implemented country-based localization, built data export features, fixed critical bugs, and improved performance, responsiveness, and API integration.
- **Technologies:** ReactJS, JavaScript, HTML5, CSS3, PHP (Laravel), MySQL, REST APIs
- **Outcome:** Enhanced a WooCommerce-like platform's performance, reporting, and global user experience through automation, localization, and critical bug fixes.

Vehicle & Spare Parts Sales & Inventory System

- Built a dynamic inventory and sales system with real-time stock validation, invoice editing, returns handling, and barcode integration
- Ensured data consistency and optimized performance for large datasets.
- **Technologies:** HTML5, CSS3, JavaScript, PHP (Laravel), MySQL, REST APIs
- **Outcome:** Ensured accurate real-time inventory tracking, reduced stock mismatches and manual errors, and improved operational efficiency through automated sales and inventory processes.

On-line Admission System - National Hotel and Tourism Training Institute (NHTTI)

- Developed a comprehensive web-based admission system to streamline application processes
- **Technologies:** HTML, CSS (Bootstrap), JavaScript, MySQL, PHP (Laravel), XAMPP
- **Outcome:** Improved efficiency of admission processes.

ADDITIONAL INFORMATION

- **Languages :** Bangla, English.
- **Awards/Activities :** Second at UITS Intra Virtual Fest Programming Contest, 2020
